

Portable Heavy Duty COMMUNICATION CABLE REELS

The RESCOM™ Cable Reel with electrical connection provides personnel with continuous communications.

Connectors at the reel allows three people to connect right at the unit with our integrated junction box. T-connectors can be added to streamline the system for multiple personnel entries (see diagram below). Any person in the line can disconnect at any time without disrupting communications for the rest of the team. Belt anchors allow for hands free operation by securing the cable to the workers' clothing.

Special Electronics & Designs Inc.® manufactures the RESCOM™ Cable Reels for use in rugged working conditions. Sturdy pneumatic tires make deployment easy on uneven ground or in rough weather conditions.

Features

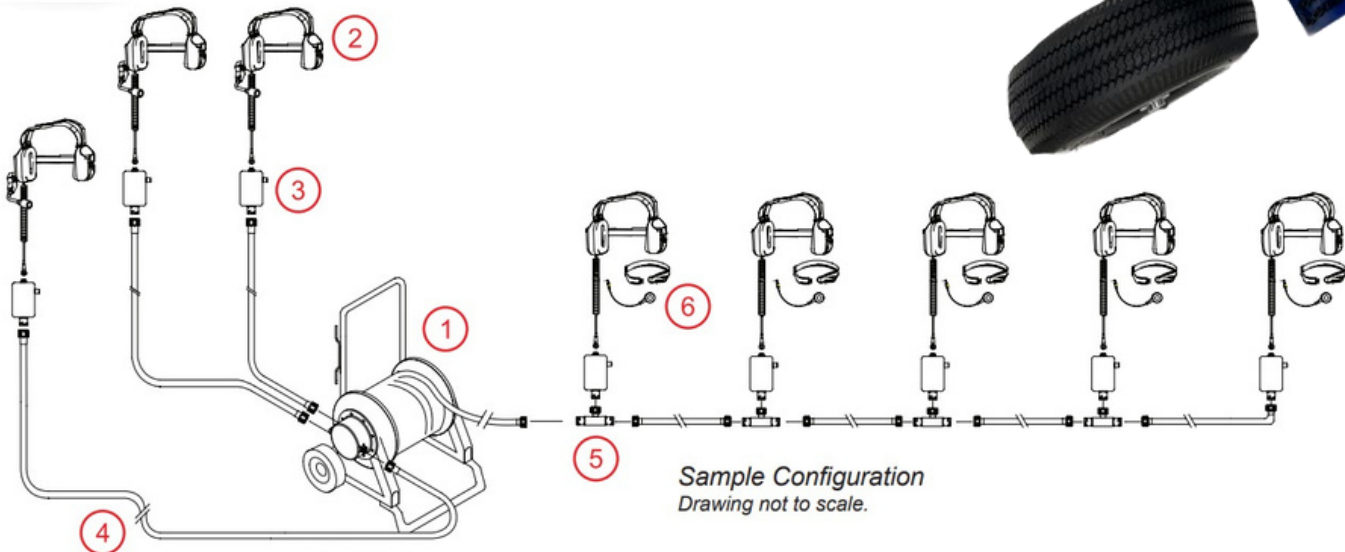

- Continuous Communication
- Connects 2 to 10 Team Members
- Pneumatic Tires
- Integrated Junction Box w/ Cannon Connectors
- Belt Anchor secures cable to personnel
- Cam Lock Cable Brake • Heavy Duty Construction
